Comprehensive fire protection
of distribution boxes

KM FIRE

KM FIRE s.r.o. is a Czech fireproof distribution boxes manufacturer with many years of experience in fire safety. We manufacture free-standing distribution boxes, surface-mounted as well as in-wall boxes.

Our products meet all building engineering equipment and fire safety requirements in the area of distribution box fire resistance. Fireproof distribution boxes are generally divided into two categories depending on the type of the required fire safety.

Circuit integrity, P-R classified – NEW!

P-R- classified distribution boxes maintaining **circuit integrity under fire conditions** ensure operation and power supply of equipment necessary for securing the operation of systems that must remain functional even in fire, such as evacuation systems, fire warning systems, emergency lighting, etc.

EI, S_a/S₂₀₀ classified fire resistance

EI-rated distribution boxes prevent fire from spreading from the inside of the box to the protected escape route and to the surrounding of the building. An equally important feature is S_a/S₂₀₀ smoke tightness, which prevents both cold and hot smoke from spreading into the building's protected areas.

Production

Our production hall is situated in Nový Bydžov, near a D11 motorway exit between Hradec Králové and Prague.

Technical specifications of our boxes

- ▶ **Circuit integrity:** P30-R, P60-R, P90-R
- ▶ **Fire resistance:** EI 30, EI 45, EI 60 a EI 90
- ▶ Structure: DP1, integrity: A1
- ▶ Ingress protection rating: IP 54
- ▶ In compliance with ČSN EN 1634-1, ČSN EN 1634-3, ČSN 73 0895, ČSN 73 0810, ČSN 73 0848
- ▶ Multi-field version of the SR free-standing boxes available
- ▶ Surface finish: powder coating, usually RAL 7035 Light Grey, different shades available on request
- ▶ The boxes can be fitted with an instrument grid, electricity meter case or mounting plate

Certificates

We have collaborated with the PAVUS, a.s. fire safety testing centre for a long time and now we also work with AFIRE s.r.o. These testing centres test our products, which are then certified for the purpose of declaring that they meet the building engineering equipment and fire safety requirements

Fireproof box configurator

We have prepared a simple configurator for you to quickly put together your own fireproof box.

You can download your configuration immediately as a PDF file, find out about the price and place your order.

Circuit integrity P-R classified distribution boxes

- ▶ Boxes standing on the floor; surface-mounted boxes
- ▶ Circuit integrity: P30-R, P60-R, P90-R
- ▶ Can be fitted with certified SKM-P ventilation system
- ▶ Certified UKM-P cable sleeves
- ▶ Structure: DP1, IP 54

F-SR-N P-R circuit integrity boxes to be installed on the floor next to a wall

- ▶ Boxes standing on the floor, the back must be attached to the wall
- ▶ Circuit integrity: P30-R, P60-R, P90-R
- ▶ Structure: DP1, integrity: A1
- ▶ Ingress protection rating: IP 54
- ▶ Compliance with ČSN 73 0895
- ▶ The boxes can be fitted with certified SKM-P ventilation system
- ▶ Certified UKM-P cable sleeves
- ▶ Surface finish: powder coating, usually RAL 7035 Light Grey, different shades available on request
- ▶ 100mm base with removable back and front panels for easy forklift or pallet truck use
- ▶ Transport lugs for easier handling can be ordered
- ▶ The boxes can be fitted with an instrument grid or mounting plate

Accessories

The following internal structures are offered for F-SR-N boxes:

- ▶ Instrument grid, cover plates with or without cut-out
- ▶ Mounting plate

Wall-mounted F-SP P-R circuit integrity boxes

- ▶ Wall-mounted boxes
- ▶ Circuit integrity: P30-R
- ▶ Structure: DP1, integrity: A1
- ▶ Ingress protection rating: IP 54
- ▶ Compliance with ČSN 73 0895
- ▶ The boxes can be fitted with certified SKM-P ventilation system
- ▶ Certified UKM-P cable sleeves
- ▶ Surface finish: powder coating, usually RAL 7035 Light Grey, different shades available on request
- ▶ The boxes can be fitted with an instrument grid or mounting plate

Accessories

The following internal structures are offered for F-SP boxes:

- ▶ Instrument grid, cover plates with or without cut-out
- ▶ Mounting plate

Cover plate with or without cut-out

SKM-P ventilation system for circuit integrity boxes

The SKM-P ventilation system is specially designed for the ventilation of circuit integrity boxes. The SKM-P ensures sufficient ventilation of the inside of the box and protects the inside against the impact of fire and hot air from the first second of fire to the maximum degree possible.

A ventilator can be installed behind the ventilation system for more efficient heat conduction

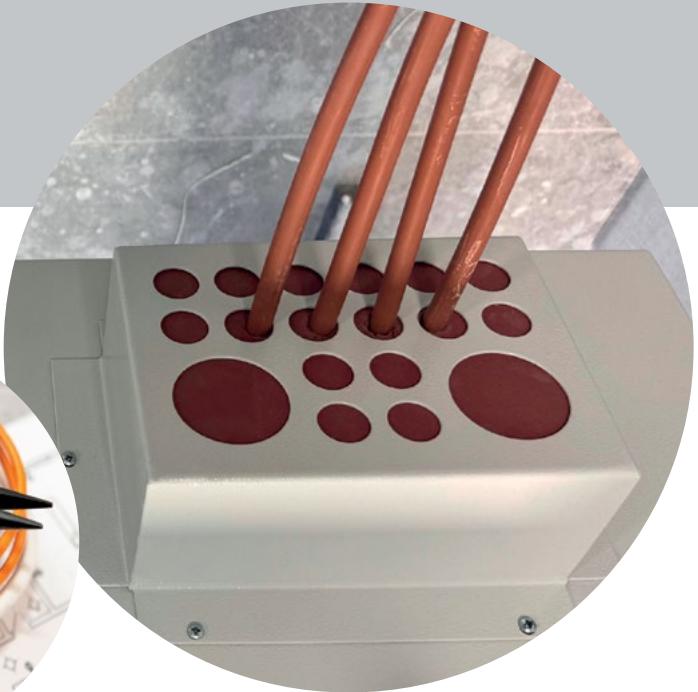

* Approximate figures

UKM-P cable sleeves for circuit integrity boxes

The UKM-P cable sleeves for circuit integrity boxes are specially designed for this type of boxes so as to prevent fire and heat from spreading into the inside of the box, including heat transfer through the cables as such. The cable sleeves are usually placed on the ceiling or floor of the box.

Cable installation is very easy. The cables are inserted into the sleeves, Then the top of the sleeve and the cables are treated with fireproof coating. After the coating has dried, strong and flexible sealing of the cables is ensured, with required fire resistance. No additional putty or packing is needed to seal the sleeve.

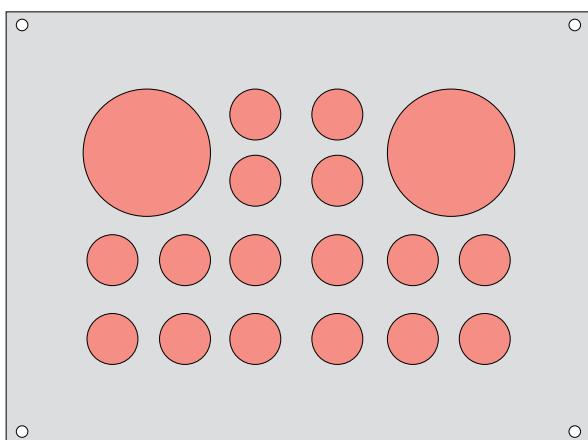

- ▶ Sleeves can be installed in box ceiling or bottom.
- ▶ Available versions: UKM-P-1 and UKM-P-2
- ▶ Multiple sleeve blocks can be fitted next to each other.
- ▶ Fast pass-through cable installation

Two versions available

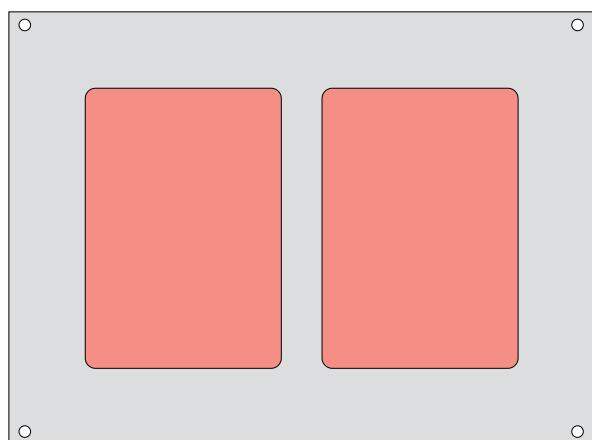

UKM-P-1

- ▶ 2 holes Ø 50 mm, 16 holes Ø 22 mm

UKM-P-2

- ▶ 2 holes [77 x 110 mm]

EI fire resistance preventing fire from spreading

- ▶ Boxes standing on the floor; surface-mounted boxes and in-wall frames with door
- ▶ Fire resistance: EI 30, EI 45, EI 60, EI 90
- ▶ Smoke-tight design: S_a/S₂₀₀
- ▶ Certified UKM and TKM cable sleeves
- ▶ Can be fitted with certified SKM ventilation system
- ▶ Version DP1, IP 54

Free-standing EI-rated SR boxes

- ▶ Fire resistance: EI 30, EI 45, EI 60 a EI 90
- ▶ Smoke-tight design: S_a/S₂₀₀
- ▶ Structure: DP1, integrity: A1
- ▶ Ingress protection rating: IP 54
- ▶ The boxes can be fitted with a ventilation system
- ▶ Certified UKM and TKM cable sleeves
- ▶ Tested in compliance with ČSN EN 1634-1, ČSN EN 1634-3
- ▶ Multi-field version of the SR free-standing boxes available
- ▶ Surface finish: powder coating, usually RAL 7035 Light Grey, different shades available on request
- ▶ The boxes can be fitted with an instrument grid, electricity meter case or mounting plate
- ▶ Atypical dimensions can be supplied after consultation.
- ▶ Supplied with a 50 mm base as a standard; 100 mm or 200 mm base can be supplied on request

Accessories

The following accessories are available for free-standing boxes:

- ▶ Instrument grid + cover plates with or without cut-out
- ▶ Mounting plate
- ▶ Electricity metre installation elements [electricity metre case, electricity metre plate, DIN rails with cover plate or without cut-out]
- ▶ Ventilation system

Cover plate with or without cut-out

Mounting plate

Electricity metre plate

Free-standing EI-rated SR boxes

Multi-field version

This is a version of free-standing SR boxes that can be connected in a compact field, with all the fire resistance features retained.

- ▶ Fire resistance: EI 30, EI 45, EI 60
- ▶ Design: DP1-S_a/S₂₀₀
- ▶ Ingress protection rating: IP 54
- ▶ The boxes are bolted together into a unified whole on the building site, with all the fire resistance features retained.
- ▶ The joint side panels of the boxes are open, so it is possible to put cables or copper strips through individual fields.
- ▶ This unique connection system is certified by PAVUS, a.s.

Surface-mounted EI-rated SP boxes

- ▶ Fire resistance: EI 30, EI 45 a EI 60 a EI 90
- ▶ Smoke-tight design: S_a/S₂₀₀
- ▶ Structure: DP1, integrity: A1
- ▶ Ingress protection rating: IP 54
- ▶ The boxes can be fitted with a ventilation system
- ▶ Certified UKM and TKM cable sleeves
- ▶ Tested in compliance with ČSN EN 1634-1, ČSN EN 1634-3
- ▶ Surface finish: powder coating, usually RAL 7035 Light Grey, different shades available on request
- ▶ The boxes can be fitted with an instrument grid, electricity meter case or mounting plate
- ▶ Atypical dimensions can be supplied after consultation.

Accessories

The following accessories are available for surface-mounted boxes:

- ▶ Instrument grid + cover plates with or without cut-out
- ▶ Mounting plate
- ▶ Electricity metre installation elements [electricity metre case, electricity metre plate, DIN rails with cover plate or without cut-out]
- ▶ Ventilation system

Cover plate with or without cut-out

In-wall EI-rated SZ L frame with door

- ▶ Fire resistance: EI 30, EI 45 a EI 60
- ▶ Smoke-tight design: S_a/S₂₀₀
- ▶ Structure: DP1, integrity: A1
- ▶ Ingress protection rating: IP 54
- ▶ The boxes can be fitted with a ventilation system
- ▶ Tested in compliance with ČSN EN 1634-1, ČSN EN 1634-3
- ▶ Surface finish: powder coating, usually RAL 7035 Light Grey, different shades available on request
- ▶ The boxes can be fitted with an instrument grid, electricity meter case or mounting plate
- ▶ Atypical dimensions can be supplied after consultation.

Accessories

The following accessories are available for in-wall boxes:

- ▶ Instrument grid + cover plates with or without cut-out
- ▶ Mounting plate
- ▶ Electricity metre installation elements (electricity metre case, electricity metre plate, DIN rails with cover plate or without cut-out)
- ▶ Ventilation system

Cover plate with or without cut-out

Mounting plate

Electricity metre plate

Instrument grid

In-wall EI-rated SZ L frame with door

Installation procedure for SZ L – EI in-wall distribution boxes

The distribution box is anchored and fixed to the wall by bolts and wall plugs through the holes in the side of the frame. While fixing the frames to the wall it is necessary to use a level to make sure the frame is level both horizontally and vertically. It is also necessary to measure and level both frame diagonals, which should be identical [± 1 mm], for correct door closing.

Any interstices between the frame and the wall must be sealed with fireproof material on the rear side of the recess. As a standard, interstices are filled with brick, mortar and adhesive. Alternatively, fire resistant expanding foam can be used. However, it must be in compliance with ČSN EN 13501-1 and its fire resistance must be higher than the fire resistance of the frame and door.

The space for the frame must be filled with brick and mortar sufficiently so that there are no interstices between the frame and the wall and the distributor is properly mechanically fixed.

During installation or handling of EI-rated distributors it is necessary to take into account the higher weight of the frame with the door and the mechanical properties of the insulation material so that the insulation layer of the door lining is not broken. The maximum angle of opening the door [approximately 120 °] must not be exceeded in handling the door so that the hinges are not unacceptably stressed and, as a result, ripped. Before the frame is mounted into the wall, it is recommended that the frames are transported and handled horizontally on a solid surface of suitable dimensions [e.g. a pallet].

The frame can be mounted into the wall without the door. The door can be removed by removing the hinge pins and unscrewing the earthing wire.

In order for the product to retain its properties, defined by the certificate, it is not permitted to remove or adjust the insulation plates, remove door sealing or make any changes to the fireproof part of the distribution box structure.

Summary of the dimensions of the brick-up holes

Ventilation system for EI-rated boxes

The SKM ventilation system is specially designed for fire-proof box ventilation. The SKM system ensures sufficient ventilation of the inside of the box under normal conditions and it also ensures maximum fire prevention and prevents fire and hot air from spreading into the protected area of the building.

A ventilator can be installed behind the ventilation system for more efficient heat conduction.

SKM ventilation system for EI-rated distribution boxes

Cable sleeves for El-rated boxes

The cable sleeves are specially designed for this type of fireproof boxes so as to prevent fire and heat from spreading through the sleeve, including heat transfer through the cable as such. The cable sleeves are usually placed on the ceiling or floor of the box.

UKM version

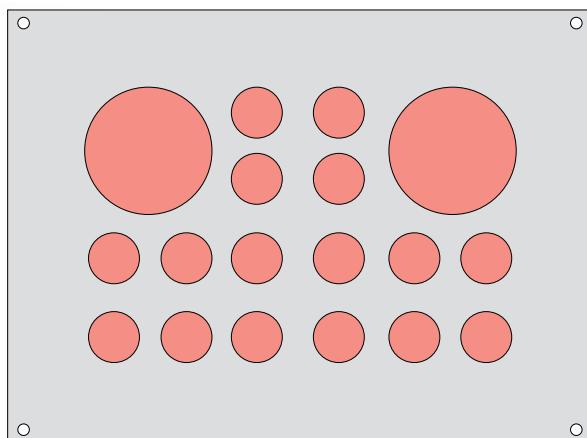

The plug consists of a fireproof fitting. Its main advantage is a very easy and fast cable installation. The cables are inserted into the sleeves, no other putty, coating or sealing materials are needed to seal the sleeve.

- ▶ Sleeves can be installed in box ceiling or bottom.
- ▶ Available versions: UKM-1 and UKM-2
- ▶ Multiple sleeve blocks can be fitted next to each other.
- ▶ Fast pass-through cable installation by inserting them into the sleeve; no other sealing is necessary.

Two versions available

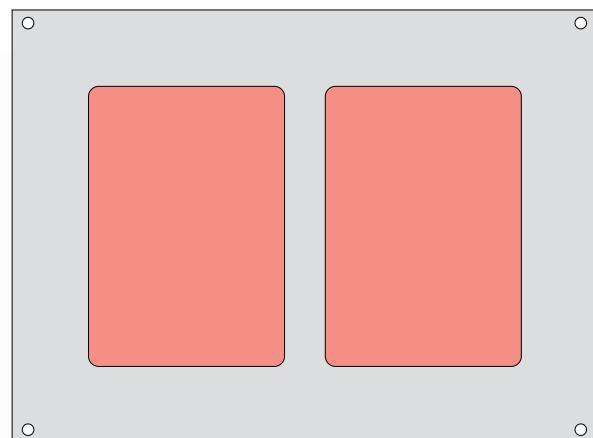

UKM-1

- ▶ 2 holes Ø 50 mm, 16 holes Ø 22 mm

UKM-2

- ▶ 2 holes [77 x 110 mm]

UKM cable sleeves – product codes

UKM-1	147301
UKM-2	147302

Cable sleeves for El-rated boxes

TKM version

Flexible version of the cable sleeve. The cables are run through a prepared small tunnel on the building site and then the tunnel hole is sealed with fireproof packing consisting of wool and fireproof putty. It must be sealed by a qualified person.

- ▶ Perfect solution for sleeves with a larger number of cables.
- ▶ Sleeves can be installed in box ceiling or bottom.
- ▶ Multiple dimension versions available
- ▶ Multiple small tunnels can be fitted next to each other.
- ▶ The tunnels are only sealed after the final installation on the building site.
- ▶ Flexible cable installation

TKM cable sleeves		
Name	Sleeve hole [mm]	Product code
TKM-1	150 × 80	147401
TKM-2	250 × 80	147402
TKM-3	350 × 80	147403
